Abstract

By altering how information and assets are transferred over the internet, blockchain technology is influencing a wide range of enterprises. The data on a blockchain is immutable, which means it cannot be changed without the approval of all network participants (or nodes).

The topic of this article is a cryptocurrency, particularly NFT Gaming Stars. NFT Gaming Stars provides a low-cost crypto trading platform, allowing users to make the maximum cryptocurrencies while retaining more security and safety. GSI is a token that allows users to earn crypto by playing video games.

Introduction

A non-fungible token (NFT) is a cryptographically generated token that uses blockchain technology to link to a unique digital asset that cannot be reproduced. Fungible cryptocurrencies such as Ether (ETH), Bitcoin (BTC), and Monero (XMR) can be exchanged for any other cryptocurrency, whereas non-fungible tokens cannot. NFTs are most strongly associated with gaming and digital collectibles, despite their use in a range of businesses.

Non-fungible tokens (NFTs) are one of the fastest-growing categories of the crypto market. NFTs are digital assets with unique identifiers stored in smart contracts.

As the market for non-fungible tokens (NFTs) grows, some gaming businesses are constructing virtual worlds within a metaverse where the same NFTs can be exchanged in a completely different situation.

Introduction

The worlds of cryptocurrency and video games are converging at a rapid pace. This revolutionary notion has grabbed the virtual gaming industry by storm, with projects springing up all the time to put it to the test. The metaverse and the NFT marketplace look to have a lot of interest.

The development of NFTs heralds a new and exciting era in which gamers take on increasingly more important roles in the gaming economy and are rewarded accordingly.

NFT Gaming Stars intends to provide a smooth cross-platform experience that will allow users all over the make cryptocurrencies while playing their favorite game by including accomplishments and rare goods from games like NFT.

GAMING STARS

META MASK

Exchange

Play and earn crypto on the most trusted decentralized exchange. Users can also exchange and stake GSI while playing amazing games.

The Stars Network unites NFT, Gaming, Decentralized exchange, and Metaverse enthusiasts.

This project is run on Decentralized Exchanges (DEXs), which allows users to rely on their virtual wallets. Users can swap crypto assets for GSI and BNB. Users can do P2P trading within our Swap exchange without any intermediaries. DEXs ensures your privacy and keep your transaction anonymous, hence users have control over their funds and wallets.

This project is not just an NFT minting website or token, but one that secures customers' trust through decentralized exchanges.

Binance Smart Chain

Binance Smart Chain is a transaction system that is fast, scalable, and low-cost. Despite the fact that BSC does not yet have the same level of popularity as Ethereum, we are confident in Binance's expertise, desire, and potential to quickly bring it there.

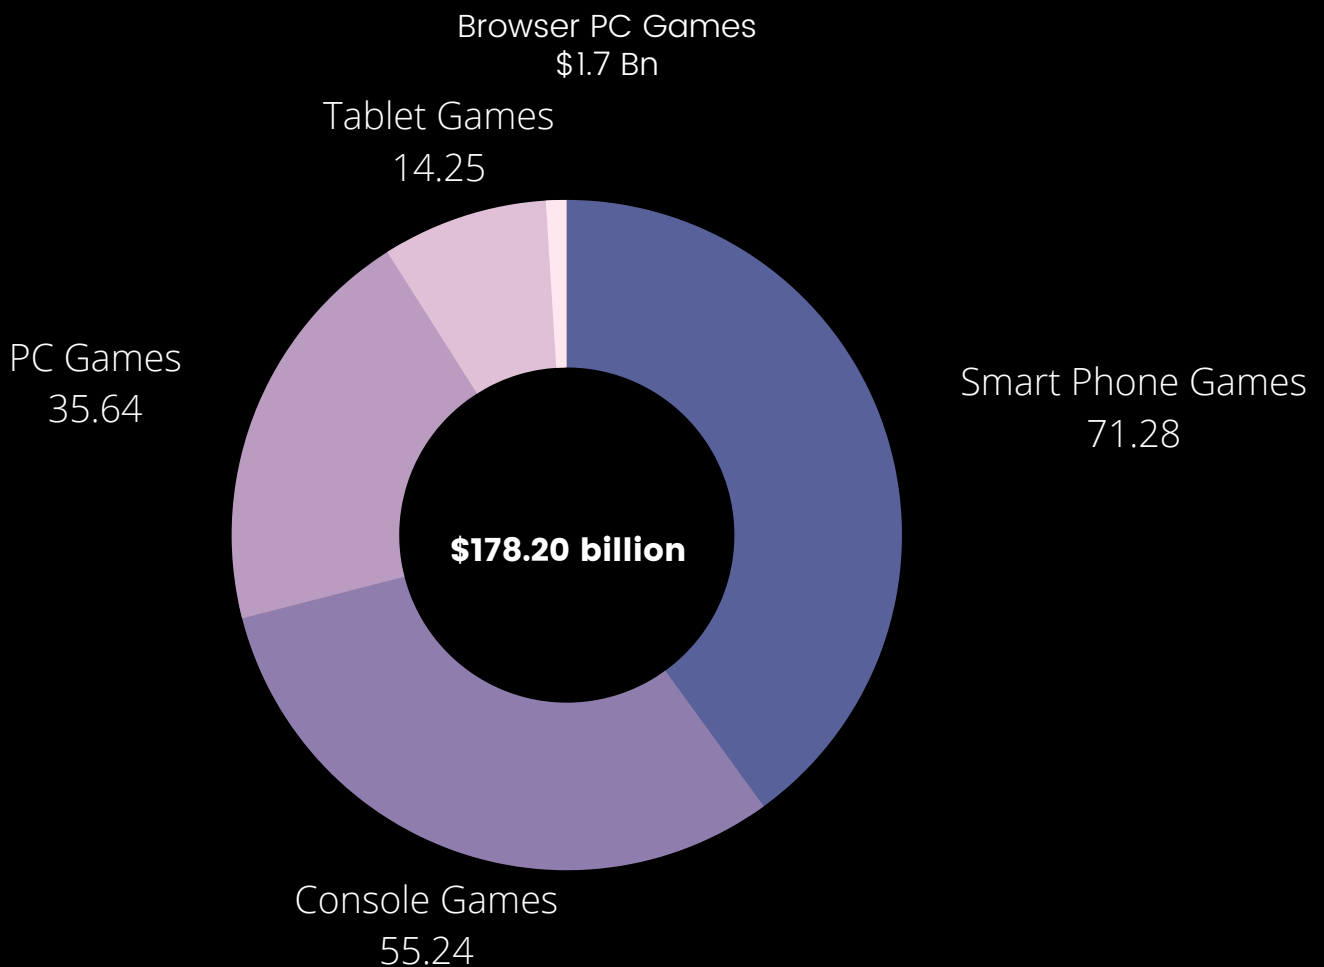

Market Size

Because of its vast application and technological possibilities, NFT may become increasingly desirable as we go forward in the digital age. According to Non-Fungible.com, NFTs' total market value was valued at USD 178.20 billion in 2021, will be USD 196.0 billion by 2022, and will be USD 314.40 billion by 2026.

According to NewZoo's, in 2022, mobile gaming will earn \$95.4 billion in sales, accounting for over half of the whole games business. Smartphones will be the main driver, with revenues of \$79.7 billion expected by 2022.

The Global Games Market

About GSI Token

NFT Gaming Stars is a Binance Smart Chain NFT platform where you may play to earn cryptocurrencies.

NFT Gaming Stars is a site that aims to deliver exclusive material related to card games to its users so that they may have fun while earning cryptocurrencies.

We're integrating blockchain and NFT technologies to better collective experiences of customers. Our platform is founded on blockchain technology, which assures the validity, traceability, and immutability of digital assets. It also features a dynamic user interface and a customizable API to assist with transactions.

In the future NFTs will only be able to be purchased with GSI

- MAX SUPPLY that will ever exist is 500 Million GSI
- 50% of MAX SUPPLY will be locked until 2023

NFT Gaming Stars

The NFT Gaming Star platform is founded on concepts of openness, fairness, and immutability, removing the chance of fraud and allowing players to start earning in-game instead of buying, trading their time and effort for concrete.

Skins, clothing, aesthetic upgrades, weaponry, land, maps, names, and much more may all be NFTs.

NFT STARS aspires to be a genuine creative world. That is why we are not limited to the marketplace paradigm; instead, we are attempting to see beyond it. We're seeing a lot of interest in interacting with NFT art in the blockchain space, and we're ready to meet it. Here's some exciting news regarding the debut of our first-ever NFT collection, which includes a variety of earning options and a bright gaming future.

1. NFT Stars
2. Gaming Stars
3. Meta Stars

- GS1 is a utility token that is designed to be the currency of purchase, utility, and action in supported play-to-earn blockchain games.
- NFT holders will be able to earn more GS1 during games.

Features

Productive

- Allow yourself to achieve your objectives in a fraction of the time it now takes to get the same results. Every blockchain-based system succeeds if the computations are done correctly. The plan is well-organized, and estimations are an important part of it.

Safe & Secure

- Our platform is built on cryptography, decentralization, and well-established standards, all of which contribute to trade confidence. Each square in a cryptographic chain interacts with the ones before it, making it virtually hard to modify.

No data loss

- Cryptography, decentralization, and understanding standards are all used in our system to secure trade confidence. Each square in a cryptographic chain interacts with the ones before it, making it virtually hard to modify.

Data Protection

- Customers benefit from our platform's added degree of protection, which incorporates decentralization and cryptography. Cryptography is a mathematical estimation that functions as a deterrent to attackers to some level.

Advantages of NFTs In Gaming

In-Game Asset Ownership and Control:

- The usage of NFTs in gaming allows the user to own game treasures

Security and Uniqueness:

- Assets can't be replicated since they're non-fungible, and they can't be owned fraudulently or lost when a game closes because they're transportable and may be saved in wallets like Trust and MetaMask.

Transparency and Provable Scarcity:

- The existence and history of ownership are entirely unalterable and accessible to the public via blockchain. Each item is also given complete transparency and verified scarcity by blockchain explorers.

Tokenomics

Total Supply:

500 Million

- For each transaction, 1% of GSI will be burned and 1% will go to the liquidity pool.
- 2% will be sent to the Company wallet to support the project research and further developments.

Road Map

- Build up the website, NFTs, and integrate them with Blockchain
- Building community, social media branding
- Reach out to artists to onboard them into NFT Stars
- Enabling users to stake GSI into our website for APY rewards

2021

2022

- Games Launch
- Starting Marketing campaign
- Hosting events with partners to promote art & NFTs
- Starting Metaverse development
- Getting listed into more exchanges
- Creating Game Applications for IOS & Android

To Be Announced ...

Our Commitment

Our commitment to our consumers includes establishing confidence and providing security. We all recognize the importance of security and compliance in achieving our objectives. We conducted a comprehensive security evaluation that includes external penetration testing, threat modeling, and risk control assessments, among other things.
